Skills

Programming Knowledge

- Completed a college level course in C, currently enrolled in a Java course. Neural network internship focused on python. Personal projects written in Java.

Teamwork

- Work and sports experience provided opportunities for me to learn to be an effective leader and team member
- My personality makes me a good listener and collaborator with other team members, no matter their personality or background

Information Retention

- Work experience and neural network internship each required rapid acquisition of information and efficient incorporation of the information into daily tasks
